**Date & Time Test Taken**

Tue, 11 October 2022 12:24:01 AM

**Date of Birth**

02/02/2021

**Patient Name**

David Brady

**Email**

cooldev0406@gmail.com

**Gender** Male**Passport****Results** **Negative****Sample Type:** Nasopharyngeal Swab**Abbot BinaxNOW POC Covid-19 Antigen Test**[FDA | Factsheet for patients](#)**Another test kit type: GenBody SARS-CoV-2 Antigen**

**If negative results:** This may mean you were not infected at the time your test was performed. This does not mean you will not get infected or sick. It is possible that you were early in your infection at the time of your test and that you could test positive later, or you could be exposed later and then develop the illness. A negative test result does not rule out getting sick later. It is still strongly advised that you monitor your health, wear a mask, and practice social distancing and proper hygiene.

**Next Steps****1 Follow your doctor's orders**

Follow your medical professional's advice to determine your course of action.

**2 Maintain social distance**

Stay home from work, school, and all activities when you have any COVID-19 symptoms. Keep away from others who are sick and limit close contacts as much as possible (about 6 feet).

**3 Wear a mask**

Wear a facial covering over your mouth and nose when you are unable to socially distance.

**4 Wash your hands**

Clean your hands often, either with soap and water for 20 seconds or with a hand sanitizer that contains at least 60% alcohol.

**5 Learn more**

COVID-19 is in a family of viruses known as coronaviruses. To learn more about COVID-19 and how you can help reduce the spread of the virus in your community, tap here.
