Phone Number**Sample Type:** Nasopharyngeal Swab**Test manufacturer/kit:** bioteke corporation**Sample processed by:** Pinnacle Genetics Labs Inc using rt-pcr test kit: [Factsheet for patients](#)

The United States FDA has made this test available under an emergency access mechanism called an Emergency Use Authorization(EUA). The EUA is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics (IVDs) for the detection and/or diagnosis of the virus that causes COVID-19. EUA# EUA203089

If negative results: This may mean you were not infected at the time your test was performed. This does not mean you will not get infected or sick. It is possible that you could be exposed later and then develop the illness. A negative test result does not rule out getting sick later. It is still strongly advised that you monitor your health, wear a mask, and practice social distancing and proper hygiene.

Next Steps

1 Follow your doctor's orders

Follow your medical professional's advice to determine your course of action.

2 Maintain social distance

Stay home from work, school, and all activities when you have any COVID-19 symptoms. Keep away from others who are sick and limit close contacts as much as possible (about 6 feet).

3 Wear a mask

Wear a facial covering over your mouth and nose when you are unable to socially distance.

4 Wash your hands

Clean your hands often, either with soap and water for 20 seconds or with a hand sanitizer that contains at least 60% alcohol.

5 Learn more

COVID-19 is in a family of viruses known as coronaviruses. To learn more about COVID-19 and how you can help reduce the spread of the virus in your community, please check CDC website.
